Solidarity Time For
BAŞKENT UNIVERSITY FAMILY

All the facilities of Başkent University have been allocated to the earthquake zone and to our citizens who were affected by the earthquake there.

From the first day of the earthquake, whose epicenter was in Kahramanmaraş, we declared a campaign at Başkent University. Başkent University has rushed to the aid of our citizens in the earthquake zone with devotion and hard work. All the facilities of Başkent University have been allocated to the earthquake zone and to our citizens who were affected by the earthquake there. Our aim is to heal the wounds of our victims and to be with them. I believe that we will get through these difficult days together. I express deep condolences and I wish a speedy recovery to our whole entire country.

Prof. Dr. Mehmet Haberal
Başkent University Founder and President of the
Executive Supreme Board

At Başkent University, we endeavor to do our best to meet all the needs of earthquake victims, together with our students.

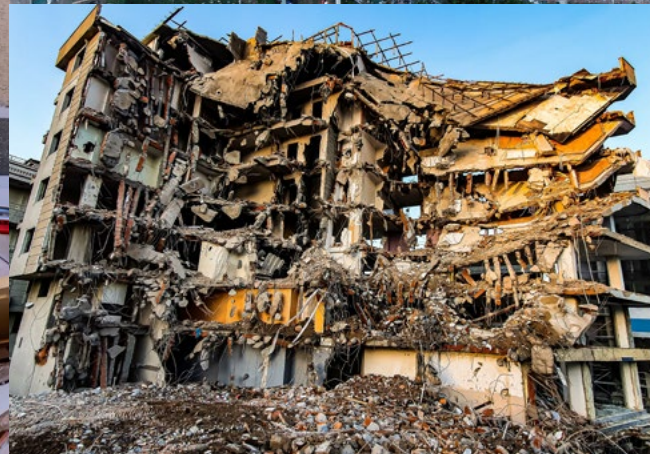

As Başkent University, we would like to do our best for the earthquake victims together with our students. We express our deepest condolences to the relatives of our citizens who lost their lives, we wish a speedy recovery to our injured citizens. We stand ready to offer help who were affected by the earthquake.

Prof. Dr. İ. Haldun Müderrisoğlu
Başkent University Acting President

Hatay Yayladağı Earthquake Mw 6.4

20 February 2023 | Saat 20:04

Latitude: 36.037 N | Longitude: 36.021 E | Depth: 21.73 km

Nearly 1,300 earthquakes were recorded from the main shock till 16:00 on 09 February, 2023 (Figure 1).

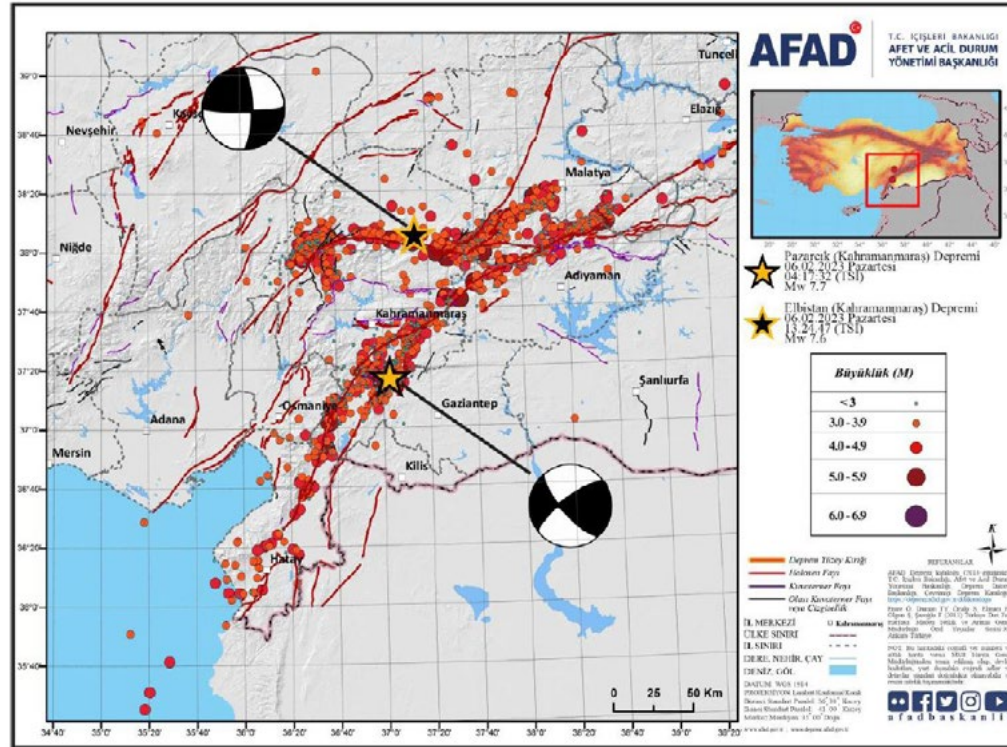

Figure 1: 06 February 2023 Pazarcık (Kahramanmaraş) Mw 7.7 and Elbistan (Kahramanmaraş) Mw 7.6 earthquakes and aftershock activity.

Source: <https://deprem.afad.gov.tr/>

According to data prepared by the USGS (United States Geological Survey) (Figure 2), the magnitude of an 8-magnitude earthquake is 50 megatons explosive (the world's largest nuclear test). It was stated that the magnitude of the 7.7 earthquake that occurred in Kahramanmaraş was equal to 32 atomic bombs in terms of explosive energy equivalent.

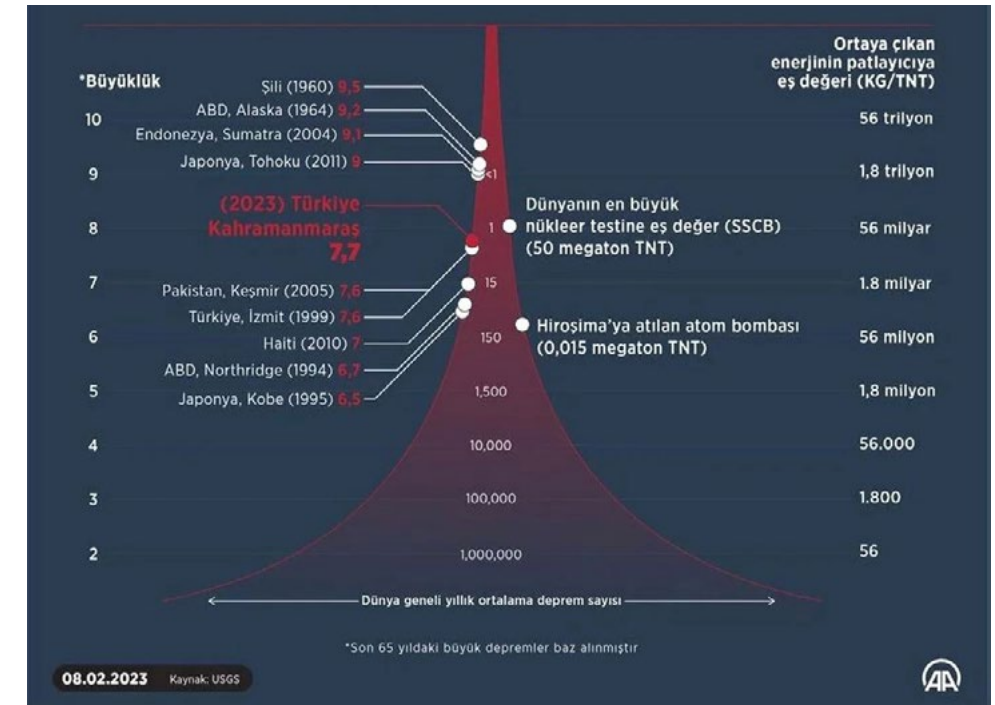

Figure 2: Intensity and magnitude of earthquakes.

On February 06, 2023, at 04:17 and 13:24 Turkish time, two earthquakes with a magnitude of Mw 7.7 and Mw 7.6 occurred in Pazarcık (Kahramanmaraş) and Elbistan (Kahramanmaraş).

While the 7.7 magnitude earthquake occurred at a depth of 8.6 km, the 7.6 magnitude earthquake occurred at a depth of 7 km. After the earthquakes, there were 7,184 more aftershocks.

At the Kahramanmaraş centered earthquakes, 41,020 people lost their lives and 105,505 people were injured at Kahramanmaraş, Gaziantep, Şanlıurfa, Diyarbakır, Adana, Adıyaman, Osmaniye, Hatay, Kilis, Malatya and Elazığ provinces according to 19.02.2023 dated AFAD press release.

310 in Kahramanmaraş, 1278 in Hatay, 581 in Gaziantep, 201 in Şanlıurfa, 101 in Osmaniye, 130 in Malatya, 50 in Kilis, 600 in Adıyaman, 20 in Diyarbakır and 24 in Adana. A total of 6,444 buildings were destroyed. With the collapse of the Iskenderun Port dock due to the earthquake, many containers overturned and caused a fire.

It was announced that 13.5 million people were directly affected by these earthquakes in Turkey. The Ministry of Environment, Urbanization and Climate Change made a damage assessment of 763,000 buildings in 13 provinces affected by the earthquake. It was determined that 41,791 buildings were destroyed or severely damaged and needed to be demolished immediately.

In the press release published on 01.03.2023 about the earthquakes that occurred in Kahramanmaraş and Hatay, AFAD stated that 45,089 people lost their lives in Kahramanmaraş, Gaziantep, Şanlıurfa, Diyarbakır, Adana, Adıyaman, Osmaniye, Hatay, Kilis, Malatya and Elazığ provinces. It is announced that 1.971.589 people were evacuated, and psychosocial support was given to a total of 1.025.291 people, 691,388 in the earthquake zone and 333,903 outside the earthquake zone.

On February 20, 2023, at 20:04 Turkish time, two more earthquakes with a magnitude of Mw 6.4 occurred in Defne (Hatay) and Yayladağı (Hatay).

While the 6.4 magnitude earthquake occurred at a depth of 16.7 km, the epicenter of which is Defne, the earthquake with the epicenter of Yayladağı occurred at a depth of 21.73 km. From the main shock to 25.02.2023 14:13, 403 more aftershocks were experienced.

AFAD announced that, in line with the notifications received in its press release dated 21.02.2023 about the earthquakes that took place in Hatay, 294 people, 18 of whom were seriously ill, were treated by the health units in various hospitals in the vicinity, and 6 people died in the region, according to the information received from SAKOM.

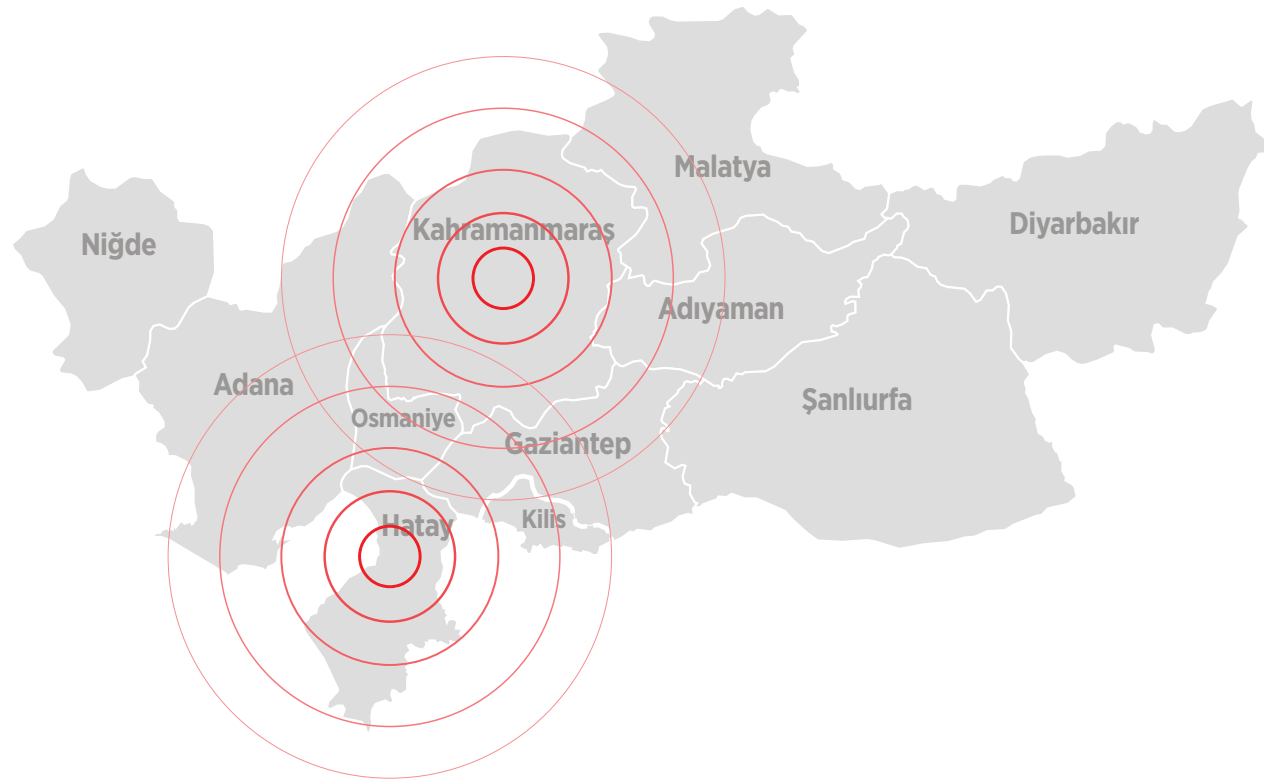

Aid for Earthquake Zone

20 trucks of water, necessities and hygiene materials
